## **Synopsis**

This "how to" guide shows small to mid-sized local governments, whether in urban or regional settings, how to develop comprehensive emergency management plans with minimal expenditure of resources. Its modular, step-by-step approach also makes it an effective guide for non-experts and those interested in self-study. The book covers both preparedness planning and actual emergency management and includes these helpful features: Uses a modular approach to developing written plans, starting with the Preparedness Plan at the federal, provincial/state levels. At its core is the Emergency Management Plan, which is essentially the establishment and operation of the Emergency Operations Center that is central to any emergency. Instructions also cover other common plans: 1) Emergency Social Services 2) Emergency Public Information 3) Emergency Telecommunications 4) Evacuation 5) Hazard-Specific 6) Mutual Aid Agreements. Takes novice emergency planners step-by-step through the four complete processes of mitigation, preparedness, response, and recovery for natural and human-made disasters. Gives tips for a staff training matrix and for developing a timetable of graduated exercises to test the written plan. ## **Customer Reviews**

This was a text for a class I took and it was easy to read and had great information in the appendixes that was useful. Recommended for anyone involved in emergency management that

needs a good basic reference.

I used this book as a text for one of my Emergency Management classes. It is easy to read and understand, and seems to cover the basics well. My only complaints were that it was Canadian-based and it was outdated - missing important information on NIMS, etc. I do recommend it though, as a good checklist when creating an emergency plan.

I bought this to review to see if I should utilize it in a course I was teaching. I found the book very useful for my students.

With all the interest in homeland security and continuity of operations (COOP), this book is an excellent and timely tool for experienced emergency management professionals. Recommended for anyone involved or interested in emergency management.
