The Magic School Bus At The Waterworks

Synopsis

To celebrate its 20th anniversary, Scholastic is re-releasing the ten original Magic School Bus titles in paperback. With updated scientific information, the bestselling science series ever is back! The classic title that started the award-winning series! Join Ms. Frizzle and her students as they follow the trail of water, from its sky-high source to the school bathroom sink on this wet and wild fieldtrip. After parking the school bus on a cloud and shrinking to raindrop size, Ms. Frizzle's class gets to see the waterworks from the water's point of view.

Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

"The Magic School Bus: At the Waterworks" is the first in a series of science picture books geared towards young ones. Written by Joanna Cole and illustrated by Bruce Degen, it marks the debut of one of the most successful concepts in the history of children's literature. Cole and Degen successfully blend fun and learning into their stories, striking a resonant chord with kids and parents alike. Because, let's face it, education - no matter what subject you're delving into - can be a tad boring at times. But anyone who's ever worked with children knows that adding a pinch of excitement and a smidgeon of enjoyment into the knowledge pot takes an otherwise bland topic and

transforms it into something delectable."At the Waterworks" introduces us to Ms. Frizzle, a one-of-a-kind instructor who knows how to take seemingly uninspiring themes and metamorphose them into action-packed adventures. The kids in her class consider Ms. Frizzle "the strangest teacher in school." And they are less than enthused when they find out their first class trip is the local waterworks; it seems to pale in comparison to field trips other classes are taking, such as to the circus or to the zoo. But these students have obviously never gone on a class trip with Ms. Frizzle; nor have they ever taken a ride in her magic school bus. Before they know it, Ms. Frizzle has sent them on a splashing journey. They learn all about the wonders of water; how it is the only substance in nature that can form into a solid, liquid or gas. They come to understand the water cycle; how water evaporates into a gas to form clouds and liquefies as it falls to the ground as rain.
