Customer Reviews

As a homeschooling mom, we've tried a variety of Math Workbooks trying to find one that works wonderfully for our family. Finally hit gold with the Horizons Math books! My 1st grader actually asks to do math now, she's finally grasping the basics and it's no longer a fight thanks to this book! My favorite feature is that it's not just a one page and then done. There is repetition and bringing up old concepts to keep them fresh! This is an all around win for our Homeschool!

VERY BEAUTIFUL SURPRISE! I love this math book because it includes all a first grader needs and has plenty of cool illustrations. We look forward to using it everyday for homeschooling and my daughter is excelling with this program. Will choose same compnay when completed Lord willing.

My kids can almost do this on there own. There is repletion as it goes in cycles bringing up old material periodically for review. I think that keeps the kids from forgetting older material. I have not bought the teacher edition yet, and have not really needed it, but I will get it for the higher levels as the material will get more difficult. I have also created my own manipulates when needed to reinforce some learning. So far it's a great curriculum!

I really like this workbook. I like that they break up the work for each lesson so that he only does a little addition, then a little skip counting, then number review, every day. He loves the pictures and actually enjoys math! yippy! I would recommend this workbook!

This workbook has good pictures. I like the repetition because it helps my children solidify and master concepts. I like that there are tests also included throughout the book.

Book 1 for grade 1. We bought to see if it would be a good fit and my 1st grader loves it. Just ordered book 2 for grade 1. Would recommend for younger children who grasp math concepts easily.

We really like Horizons Math. We have used them for first, second and third grade. This first grade workbook is great!

Great Product.
